

How to:

Share PREM Survey Data with Clinical Team Members

1

Review PREM survey data with your Respectful Care team monthly.

2

Prepare a handout/slides of quarterly, yearly, or cumulative PREM survey results at your hospital.

3

Share the PREM survey results with OB clinical staff in break rooms, at change of shift, and at OB provider/staff meetings.

4

Determine focus areas to actively implement Respectful Care Practices on your unit: Which key elements will you work on?

5

Engage clinical team members in a plan of action, such as commit to sit, shared decision making, review of respectful care practices.

To reach your goal of improving **Respectful Care**, host a Respectful Care Breakfast or Meet & Greet. Identify patient partners to provide input on ongoing quality improvement efforts.
